

Slack Commands

To alert a user:

1. go to the slack channel of which you want the user's attention
2. type `/alert @username [... @username]` (can do multiple names)

to see your alerts:

1. type `/alert` with no arguments.
2. You will see a list of all alerts from users and what channel they are in

to clear an alert:

- type `/clear` to clear all alerts and reset light
- type `/clear @username` to clear all alerts from a specific user
- type `/clear #channel` to clear all alerts from a specific channel
- type `/clear @user #channel` to clear all alerts from a specific user from a specific channel

to toggle your light:

- type `/light` to reset your light and toggle its current state
- type `/light bookmark` to select a predefined bookmark with the name of “bookmark”

to make pulse speak:

- type `/yell your message here` to have pulse read your message in its default voice
- type `/yell <speack>your message here</speack>` for pulse to read your SSML in a default voice
- type `/yell [en-AU C] message` to read message in wavenet accent “en-AU” using voice “C”
- type `/yell [en-AU C] <speack>message</speack>` to read SSML in “en-AU” using voice “C”

to see a security camera:

1. type `/view` - this may take several tries
2. click the appropriate button – this may also take several tries

Bulb Selector

SAVE BULB PRESET:

1. set "Owner Name" to your name
2. set "Slack ID" to your slack user ID –
 1. click your profile photo in any slack channel or the top left corner
 2. click either "Profile" or "View Full Profile" depending on icon clicked
